The Machine Learning Context

Artificial Intelligence

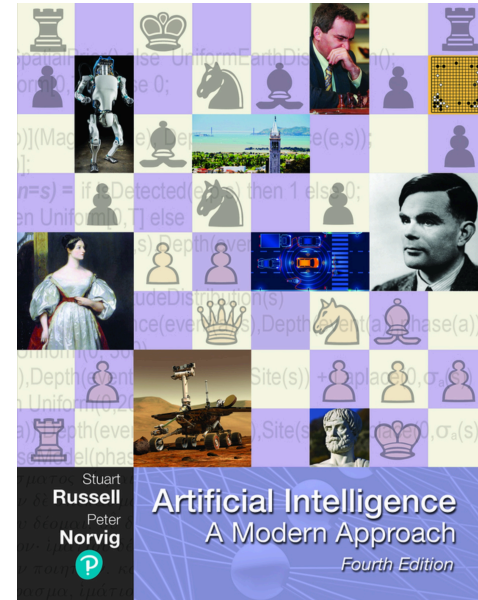

The field of **Artificial Intelligence (AI)** is concerned with *understanding and building intelligent entities.*

Stuart Russell and Peter Norvig, Artificial Intelligence: A Modern Approach (4th Edition)

The field of **Artificial Intelligence (AI)** is concerned with *understanding and building intelligent entities.*

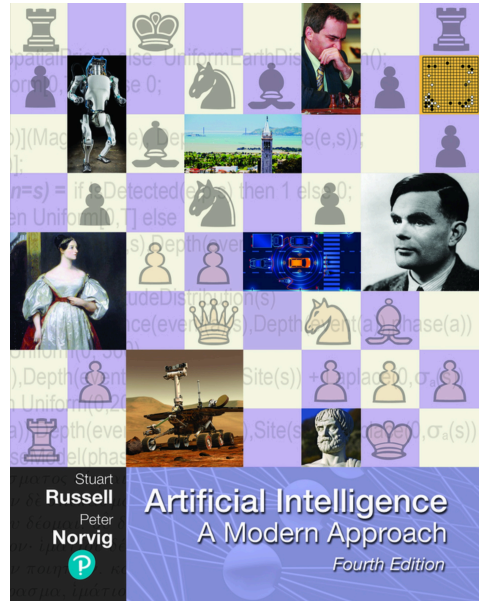

Artificial Intelligence - Intelligent Entities Rows

Stuart Russell and Peter Norvig, Artificial Intelligence: A Modern Approach (4th Edition)

The field of **Artificial Intelligence** (AI) is concerned with *understanding and building intelligent entities*.

Artificial Intelligence - Intelligent Entities Rows and Columns

Stuart Russell and Peter Norvig, Artificial Intelligence: A Modern Approach (4th Edition)

The field of **Artificial Intelligence** (AI) is concerned with *understanding and building intelligent entities*.

The field of **Artificial Intelligence** (AI) is concerned with *understanding and building intelligent entities*.

The field of **Artificial Intelligence** (AI) is concerned with *understanding and building intelligent entities*.

Code Example

```
from sklearn.datasets import make_blobs
import matplotlib.pyplot as plt

---

# Generate sample data
X, y = make_blobs(n_samples=100, centers=2, random_state=42)

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()

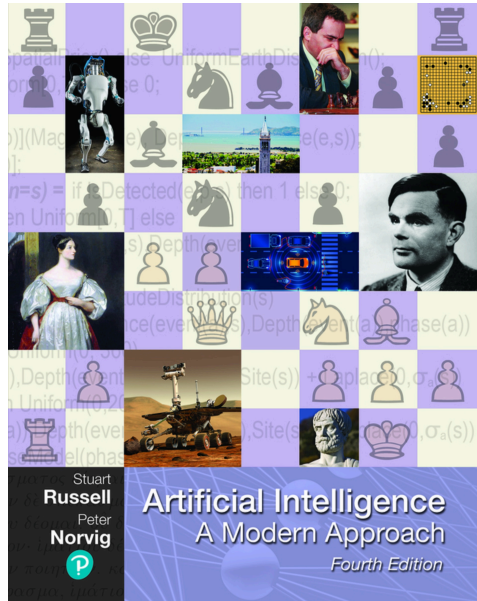

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()
```

Code Example in Columns

Stuart Russell and Peter Norvig, *Artificial Intelligence: A Modern Approach* (4th Edition)

The field of **Artificial Intelligence (AI)** is concerned with *understanding and building intelligent entities.*

```
from sklearn.datasets import make_blobs
import matplotlib.pyplot as plt

---

# Generate sample data
X, y = make_blobs(n_samples=100, centers=2, random_state=42)

---

# Plot the data
plt.scatter(X[:, 0], X[:, 1], c=y)
plt.title("Sample ML Dataset")
plt.show()
```

Many Thanks!
